

2-WAY / 4-WAY HOSE SYSTEM COMPONENTS

FEATURES AND USER NOTES

AIR STUD: your hose system is equipped with an M-style air stud.

AIR HOSES: your hose system features an 8mm I.D. primary hose and 6mm I.D. secondary hoses. The hoses have a flexible, single rubber construction and are wrapped in a PET Polyester braided sleeve.

ANTI-TANGLE SWIVEL: your hose system is equipped with a swivel fitting where the primary hose connects to the hose splitter. This prevents the hose from kinking when stowing and deploying. Take a moment to notice this function and save precious time on the trail!

HOSE CLIP: the hose clip helps with stowing by securing the secondary short hose to the assembly while it's being coiled. Be sure to utilize this feature for more time savings!

PUSH-ON AIR CHUCKS WITH QUICK-RELEASE: your hose system is equipped with premium, closed-end air chucks that easily engage onto the valve. To release, simply pull back on the aluminum collar.

MOLLE-COMPATIBLE CARRY BAG: your hose system comes in a carry bag that can easily be mounted to MOLLE panels using the Velcro straps, so you're always organized and ready to go. There's also a small pocket for your tools and spares.

USING YOUR 2-WAY / 4-WAY HOSE SYSTEM

1. Remove the hose from the carry bag.
2. Connect the primary hose air stud to your air source.
3. Uncoil each hose and connect the secondary hose push-on air chucks to the tire valves.
4. After inflating/deflating, disconnect the air chucks from the tire valve by pulling on the collar.
5. Disconnect the hoses from your air source and stow the hose in the carry bag.

SUGGESTED HOSE SETUP BASED ON AIR SOURCE LOCATION

4-WAY AIR HOSE SIZING GUIDE

HOSE LENGTH	PRIMARY HOSE	SECONDARY HOSE - SHORT	SECONDARY HOSE - LONG	WHEELBASE
